

Guide til download og installation af Nspire Windows

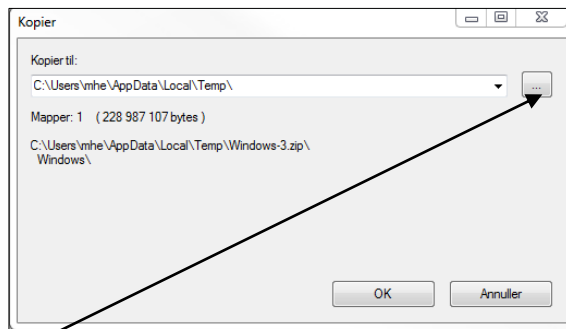

Klik på ikonet her for at starte download af Nspire

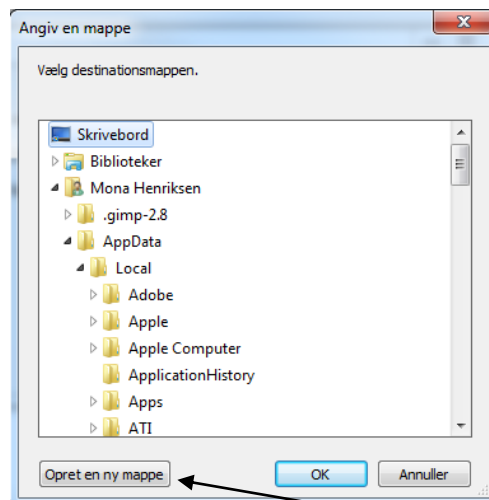

Klik på OK

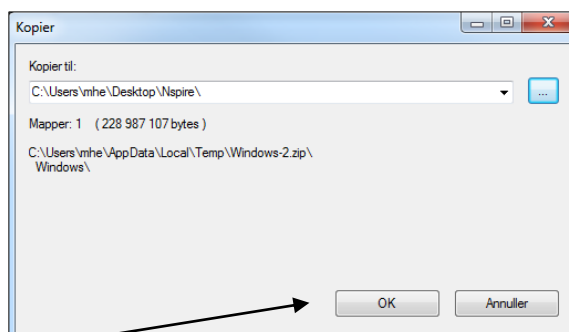

Herefter åbner et nyt vindue og her er det VIGTIG at du vælger Udpak

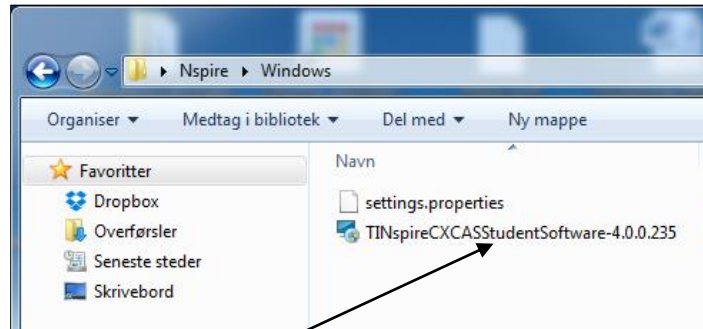

Du kan her vælge en anden placering hvor Nspire skal udpakkes, så den er letter at finde efterfølgende, klik her

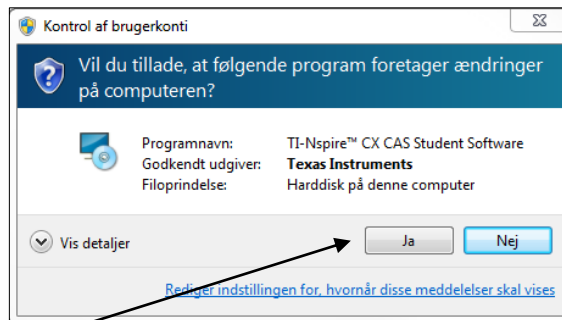

I dialogboksen der kommer frem markerer du "Skrivebord" og herefter klikker du på Opret ny mappe, navngiv den evt. Nspire (mappen skal slettes efter installationen)

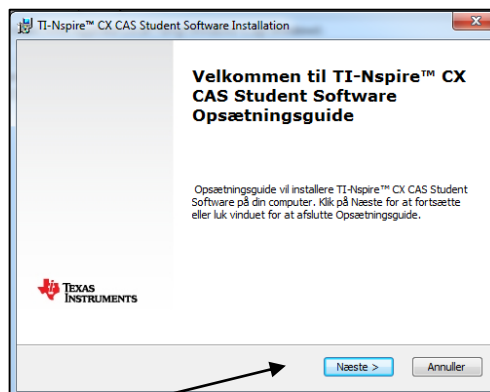

Klik OK

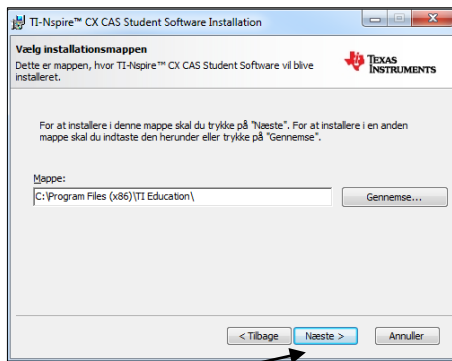

Når filerne er pakket ud åbner du mappen på skrivebord, (jeg har her i vejledningen kaldt den Nspire) klik her for at starte installationen

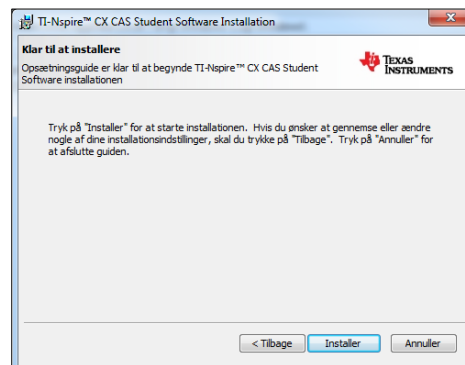

Klik Ja for at tillade installationen

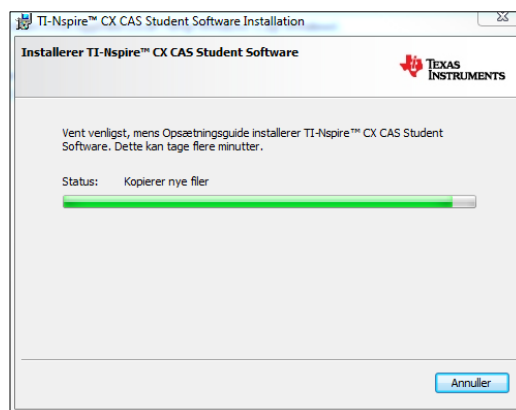

Klik Næste

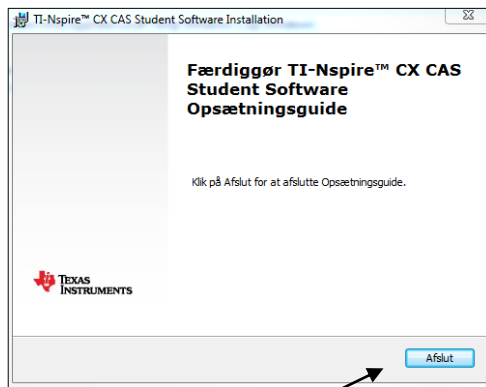

Klik Næste

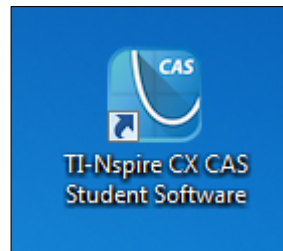

Klik Installerer

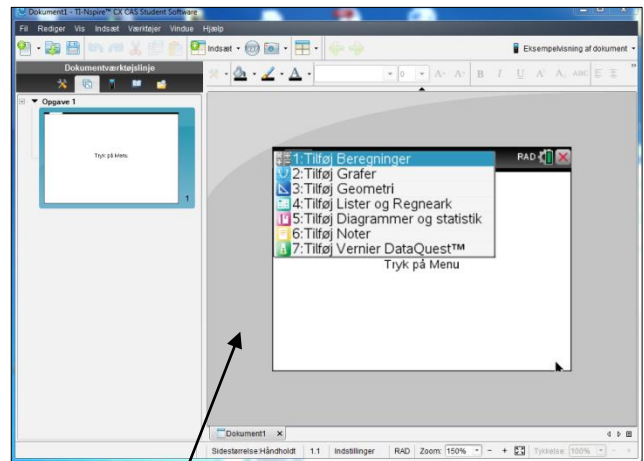

Hav lidt tålmodighed.....

Klik på Afslut

Find ikonet her på dit skrivebord og klik på den ☺

Når Nspire starter skal du ende med at få denne her hovedvindue
